

SK HYALURONIC ACID BASED INJECTABLE FILLERS – Q&A

1. What Is Teosyal®?

Made in Switzerland, Teosyal® is a new range of wrinkle-filling products, 100% hyaluronic acid based, highly biocompatible, absorbable. Teosyal® can be injected in the whole face, neck, décolleté and hands.

2. Why Should You Come To SK For Your Hyaluronic Acid Based Injectable Fillers?

Swiss made Teosyal® is manufactured in the heart of Geneva by the biotechnology company Teoxane. Their research and development department have created 8 unique products and continue to invest in the development of new products. At SK we use Teosyal® fillers as our practitioner has found that this product causes less puffiness and swelling compared with other similar brands. Teosyal® won the best injectable product of the year at the Aesthetic Medicine Awards 2008.

3. How Does It Work?

A determining moment: during the procedure, your practitioner will question you about your medical history and will establish a complete diagnosis of your face to propose you an adapted programme treatment. Teosyal® is injected under the wrinkle, with an extremely fine needle, allying precision and comfort, returning the little painful injection.

4. Is It Safe?

Our commitment to supplying the best hyaluronic acid ensures absolute product quality and safety for the patient. Teosyal® guarantees that its gels are extremely pure, far beyond the standards required by legislation. This purity is the guarantee of exceptional tolerance and perfect integration into skin tissue.

5. Are There Any Contra-Indications?

Teosyal® injections are not advised for pregnant or breastfeeding women or for people with known hypersensitivity to hyaluronic acid, autoimmune disease or other diseases affecting the immune system.

Pre injections: During the week prior to the injection, the use of high doses of aspirin, anti-inflammatory painkillers and anticoagulants is strongly discouraged.

Post Injections: During the days following the injection, exposure to extreme temperatures should be avoided (intense cold, saunas, UVs and the sun)

6. Are Your Practitioners Medically Qualified?

Yes. Julia Hadleigh is a local professional and is a qualified nurse.

7. Are Your Treatments Successful?

Yes. Please ask SK reception for Before & After treatments.

BEFORE

AFTER

TEOSYAL® Kiss reshapes and plumps lips and erases lines.

The face looks naturally well, furrows are greatly reduced and shadows and hollows around the cheekbones disappear with the use of TEOSYAL® Deep Lines and TEOSYAL® Ultra Deep.

When treated with TEOSYAL® Ultra Deep and TEOSYAL® Global Action, the bottom of the face is
